4. The following is an examiner's statement of reasons for allowance: The affidavit filed 12/21/2007 was sufficient to overcome the Cohen reference. The Berckmans reference is cited as being the closest prior art available, and is made of record. The Berckmans reference fails to teach a method, apparatus, or instructions for displaying option market information comprising inputting at least the underlying asset symbol and a strike price of an option, generating a display page listing option data for the underlying symbol and the strike price, wherein the option data includes at least one quotation for each option series, and at least one national Best Bid and Offer.

Berckmans teaches listing option data, but does not retrieve option data based on an input asset *and* strike price entered, and does not result in at least one quotation for every series, nor at least one National Best Bid and Offer (see figure 3).

No prior art of record, either alone, or in combination with any other prior art teaches these missing claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
